Canon EOS 5D MKII / III with battery pack, Nikon D3S, D1, D800 and others with similar camera body size – LWS 401-93

Lightweight support

LWS Lightweight supports:
They consist of a base plate and a construction which brings your camera to the normative height, a rod clamping and the actual support rods. These aluminum rods have a Ø of 15mm.

With the suitable LWS for your camera various accessories are compatible: E.g. follow focus DV StudioRig, MatteBox, lens support bracket and many others.
The lightweight support 401-421S comes with a twist stopper (see picture on the right).

LWS 401-93 for Canon EOS 1D sizes holds the camera in place by means of the rod clamping (see picture above).

For tripod use a 1/4” and 3/8” thread on the base plate is provided.

Please note!
For Canon EOS C300/500 use LWS 401-94/HD

Lightweight support, choose according to your camera:

Follow focus system - StudioRig

Follow focus system:
Helps you to pull focus precisely and to mark your focus range on the scale of the hand wheel. The VariLock 2 feature allows you to set two focal planes individually, to ease rehearsals and to manually control auto focus lenses.

The mentioned DV StudioRigs are equipped with 15mm rod clamping, hand wheel with scale and focus drive mod 0.8.

206-05SP & 206-65S StudioRigs are equipped with a reverse gear. Some lenses rotate against the standard rotating direction (standard e.g. is Canon EF) therefore a reverse gear is necessary to come back to the usual rotating direction.

Follow focus system:
206-05S-12 DV StudioRig follow focus system, complete with hand wheel, scale, focus drive mod 0.8
206-05SP DV StudioRig Photo with reverse gear, complete with hand wheel, scale, focus drive mod 0.8
206-60S-12 DV StudioRig plus, follow focus system, complete with VariLock 2 hand wheel, scale, focus drive 0.8
206-65S DV StudioRig plus Photo, with reverse gear, complete with VariLock 2 hand wheel, scale, focus drive 0.8

Gear ring focus, please choose according to your lens (all mod. 0.8):
201-19 Gear ring fix for Canon EF 24-105mm Ø 82mm 113.00 €
206-753 Gear ring splitted for Canon EF-S 18-135mm Ø 75.3mm 133.00 €
206-720 Gear ring splitted for Canon EF 15-85mm Ø 72.0mm 133.00 €
206-836 Gear ring splitted for Canon EF 24-70mm Ø 83.6 mm 133.00 €
206-890 Gear ring splitted for Canon EF 70-200mm Ø 89.0 mm 133.00 €
206-30 Gear ring flexible adjustable, 109.00 €
for photo lenses Ø 60-120mm, rotation angle approx. 270-320°

To mount your follow focus system, use a rod system with 15mm. Please choose the suitable LWS lightweight support for your camera.

### MatteBox, SunShade – for use of filters and for light prevention

**MatteBox 450-R20** with 450-20 Flexi-Insertring, mounted on 401-93 lightweight support on Canon EOS 1D camera.

**MatteBoxen and SunShades allow the use of glass filters. They improve picture quality because they prevent from stray light. Lenses with tube or rotating front element can only be used with restrictions.**

Fluid zoom drive

Fluid zoom drive
allows smooth zoom control. The integrated damping mechanism adjusts variably and adapts to the zoom behaviour of each lens.
Even extremely smooth-running zoom gears can be operated smoothly and with high precision.

To mount your Fluid zoom drive, use a rod system with 15 mm. Please choose the suitable lightweight support for your camera.

Fluid Zoom Drive mounted on lightweight support, incl. further Chrosziel accessories on Canon EOS 5D MK II

Recommendation - EU15:
The bracket increases the mounting radius of your Fluid zoom drive to Ø 15 mm LWS rods.
Required for short zoom lenses and with further combination accessories like follow focus etc.
Accessories for DSLR cameras with video function

Canon EOS 5D MKII / III, 550D, 600D, 7D, 1D Mark IV, Nikon D90 and others with similar size – LWS 401- 421S

Shoulder support, carrying handle, handle bars

Use the **3025** DV-Balancer® for handheld shots from the shoulder. Fits directly on the LWS or mounts with 1/4” screw.

The shoulder support **3025 DV-Balancer®** very easily positions the camera and the hands remain free.

Use your DSLR camera as portable video camera with the Chrosziel hand grip (**3300**). For mounting on Chrosziel lightweight supports (LWS 401-4xx). Tool-free installation, also useable with tripod plate mounted.

**Shoulder support, carrying handle, handle bars**

- **3025** DV-Balancer® shoulder support, classic version with flat belly rest for cameras up to 4 kg.
- **3035** Shoulder pad proVideo, straight connection to LWS
- **403-10** Handle bar proVideo to mount on 15 mm LWS rods, grip width approx. 180 mm
- **403-20** Handle bar proVideo plus to mount on 15 mm LWS rods, grip width approx. 270 mm
- **3300** Carrying handle to use with LWS lightweight support
- **3310** Accessory clamp for DSLR handle 3300 and Ø 15 mm rods, with threads 3/8” and heli coil 1/4”

**Rec. retail price**

- **3025** DV-Balancer® shoulder support, classic version with flat belly rest for cameras up to 4 kg. **431.00 €**
- **3035** Shoulder pad proVideo, straight connection to LWS **179.00 €**
- **403-10** Handle bar proVideo to mount on 15 mm LWS rods, grip width approx. 180 mm **89.00 €**
- **403-20** Handle bar proVideo plus to mount on 15 mm LWS rods, grip width approx. 270 mm **89.00 €**
- **3300** Carrying handle to use with LWS lightweight support **144.00 €**
- **3310** Accessory clamp for DSLR handle 3300 and Ø 15 mm rods, with threads 3/8” and heli coil 1/4” **17.00 €**

For use of these systems you need a 15 mm lightweight support. Please choose the suitable lightweight support for your camera.

**Shoulder pad proVideo** **3035** mounted on Chrosziel LWS lightweight support with proVideo handle bar **403-10**.

**403-10 and 403-20** proVideo handle bar is an additional carrying version to mount on 15 mm LWS lightweight support rods.

**3310 accessory clamp**
